CAREER OBJECTIVE

Computer Science and Engineering undergraduate with a CGPA of 7.78, interested in cybersecurity, software development, web development, and programming. Skilled in Python, Java, C, SQL, and web technologies, with practical experience in security log analysis, password strength evaluation, and web application security testing. Eager to apply analytical thinking, problem-solving, and technical skills to real-world engineering challenges.

EDUCATION

KL University 2023 – 2027
B.Tech in Computer Science and Engineering CGPA: 7.78/10
DePaul Junior College – Intermediate (MPC) 2021 – 2023
Berhampur 67%
St. Vincent Convent School 82%

TECHNICAL SKILLS

Programming: Python, Java, C
Frontend: HTML, CSS, ReactJS
Backend: Node.js, Spring Boot
Databases: DBMS, SQL
Tools: Git, GitHub, Linux, VS Code, WSL2
Cybersecurity: SOC Operations, Log Analysis, Threat Detection, Vulnerability Assessment, Web Application Security Testing

PROJECTS

Network Penetration Testing Lab *Cybersecurity Project*

- Configured an isolated virtual security lab using Kali Linux and Metasploitable2.
- Performed network reconnaissance and service identification using Nmap.
- Reviewed FTP anonymous access, WebDAV configuration, and web application security.
- Documented security observations and assessment evidence using Git and GitHub.
- GitHub: Network Penetration Testing Lab

SecureCorp Security Assessment Engagement *Cybersecurity Capstone*

- Conducted security assessment activities in an isolated lab using Nmap, DVWA, and Metasploitable2.
- Reviewed web application security risks involving SQL injection, XSS, brute-force testing, and command injection.
- Organized assessment evidence and technical documentation using Git and GitHub.
- GitHub: SecureCorp Security Assessment

SOC Log Analyzer

- Developed a Python-based tool to analyze security logs, identify suspicious activity, and generate structured reports.
- Applied networking and security concepts for event analysis and threat detection.

Password Security Analyzer

- Built a web-based tool to evaluate password strength using length, character variety, and common-pattern checks.
- Designed a responsive interface using HTML, CSS, and JavaScript.

Responsive Login and Registration Page

- Created responsive login and registration forms with basic validation using HTML and CSS.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Database Management Systems (DBMS)
- Automation Anywhere Certified: RPA
- Aenexz Tech Private Limited – Cyber Security Internship
- Aenexz Tech Private Limited – Cyber Security Training Completion

LEADERSHIP AND ACHIEVEMENTS

- Completed hands-on academic and lab-based work involving security log analysis, network security, vulnerability assessment, and web application testing.
- Maintained technical project evidence and documentation using Git and GitHub.
- Demonstrated analytical thinking and troubleshooting skills while working with development and security tools.
